Here is the discussion forum for this part of the course. Please either post your comments/observations/questions or share your creations.

Let us suggest some topics of discussion:

SUGGESTED TOPICS

- The given examples come with PHP code. If you adapt them to work with other server side languages, please share your contributions in the forum!

- There are many possible improvements for the provided examples in the client code: monitoring the speed of upload/downloads, canceling an upload, etc. The examples are given "as is"... if you improve them, as usual, share them in the forum!
